

**Amendment to THE DRAWINGS**

**These THE DRAWINGS pages will replace all prior versions of the THE DRAWINGS pages in the application:**

**REMARKS:**

1. The patent by Pinckley was studied. It has no resemblance to this application. This application considers a peak limiting of multi-carrier signal and later filters and equalizes the baseband representative of individual carriers to maintain the emission and signal quality metrics. Pinckley applies Crest Factor reduction on the individual signals. This approach does not produce any results since after reconstruction of the signal the Crest Factor can increase again.
2. The text of the application is amended to properly reflect the embodiments of this application.
3. The drawings of the application are amended to properly reflect the embodiments.
3. Claims 1 and 12 have been amended. Claims 1-12 are now pending in the Application.
4. After a telephone conversation with examiner Chan, applicant has amended the drawings, title, description text, and claims to overcome drawing compliance with 37 CFR 1.121(d), the claim objection and 35 U.S.C. 112, second paragraph rejection.
5. In view of the foregoing, claims 1-12 as amended are believed to be in condition for allowance.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Kiomars Anvari", with a long horizontal flourish extending to the right.

Date: July 21<sup>st</sup>, 2006
